kept

Find out if your skincare is actually working

Kept turns a new product into a fair trial on your own face

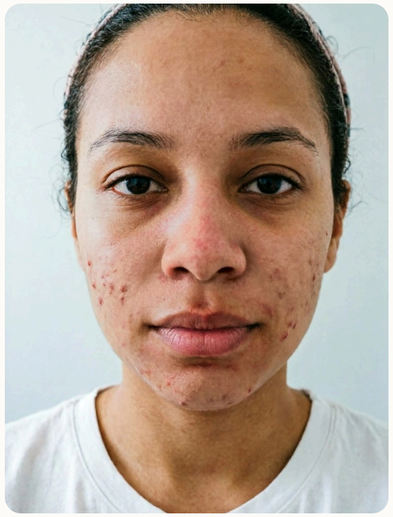

Week three, and your chin looks worse. Is it failing, purging, or just the light?

Day 0 — 49 blemishes

Day 56 — 11 blemishes

Target for day 56
Simulated with YouCam

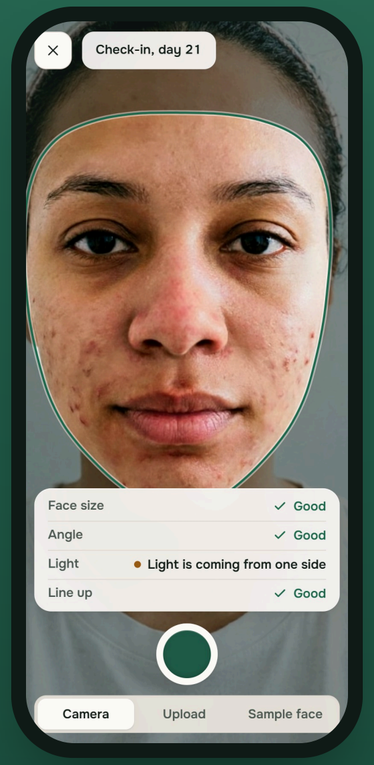

Working

Acne
66 → 74
target 72

Pores
69 → 80

2% salicylic acid serum from the sample shelf. Higher scores mean better skin. Face generated with YouCam AI.

A score and a map per area

YouCam AI Skin Simulation

Your face at the goal, scored as the target

Likely purging

72 → 66

acne on day 18, inside the purge window

Keep going

Verdict

Plain rules weigh the noise and the active's timeline

Three sample trials, three different answers

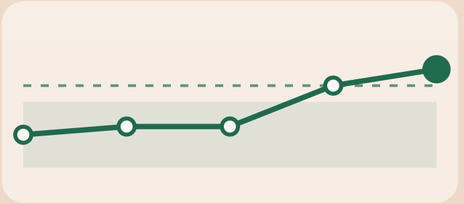

Working

2% salicylic acid serum, 56 days

66 → 74

acne, target 72

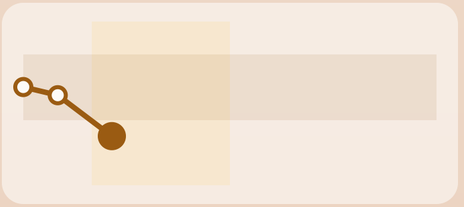

Likely purging

0.05% retinal cream, day 18 of 84

72 → 66

acne on day 18, inside the purge window

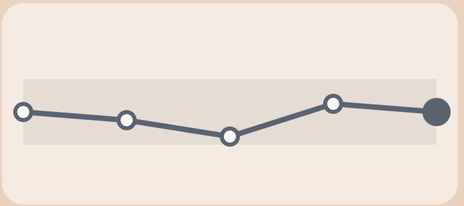

Not doing enough

10% niacinamide toner, 56 days

69 → 69

pores, every check-in within ±4

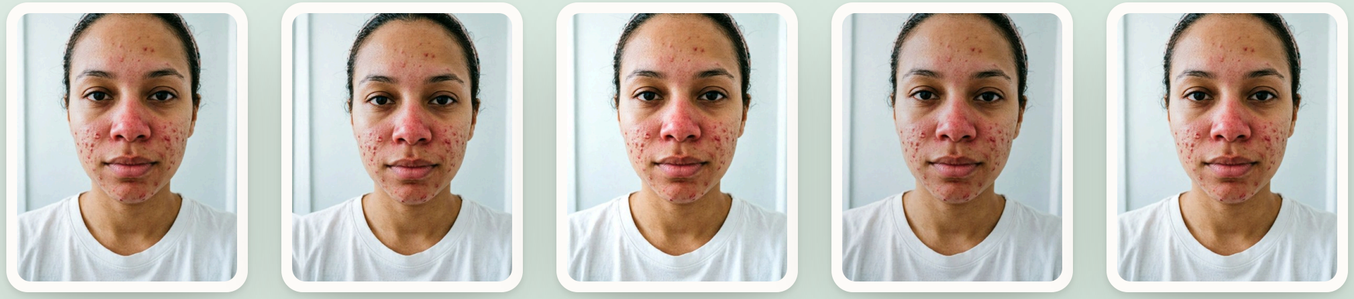

Higher scores mean better skin. Face generated with YouCam AI, later photos simulated, scores from YouCam AI Skin Analysis.

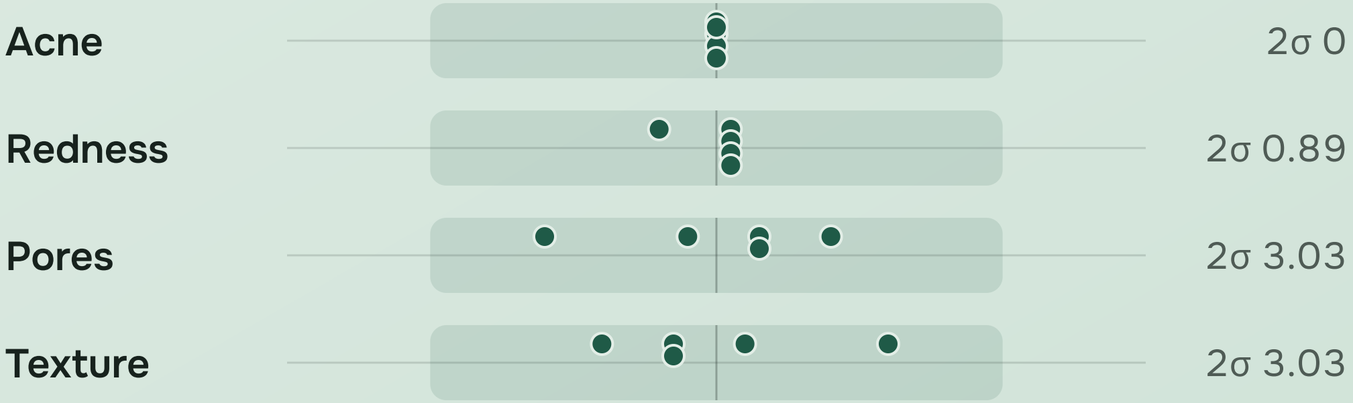

A change counts only when it beats the noise

±4

points between repeat photos, measured with YouCam

Five versions of one photo. The widest spread was 3.03 points, so Kept uses 4.

Each dot is one photo's distance from the average. The band is ±4, treated as no change.

Before you buy

Paste the ingredients. Kept checks them against your past trials and current scores.

Think twice

Actives in Niacinamide 10% serum

Niacinamide | Ceramides and hydrators

Didn't work for you before

Niacinamide didn't change your pores or oiliness in 56 days

See trial
10% niacinamide toner

Not a problem for you

Your pores score 80, your oiliness scores 82 and your redness scores 80. This product targets things that aren't a problem for you

+ Start a trial with this product

Sunscreen

SPF won't show results in eight weeks. Instead, YouCam AI Aging Simulation shows your face years ahead.

What runs where

The assistant explains the verdict but cannot change it, and sees photos only with permission.

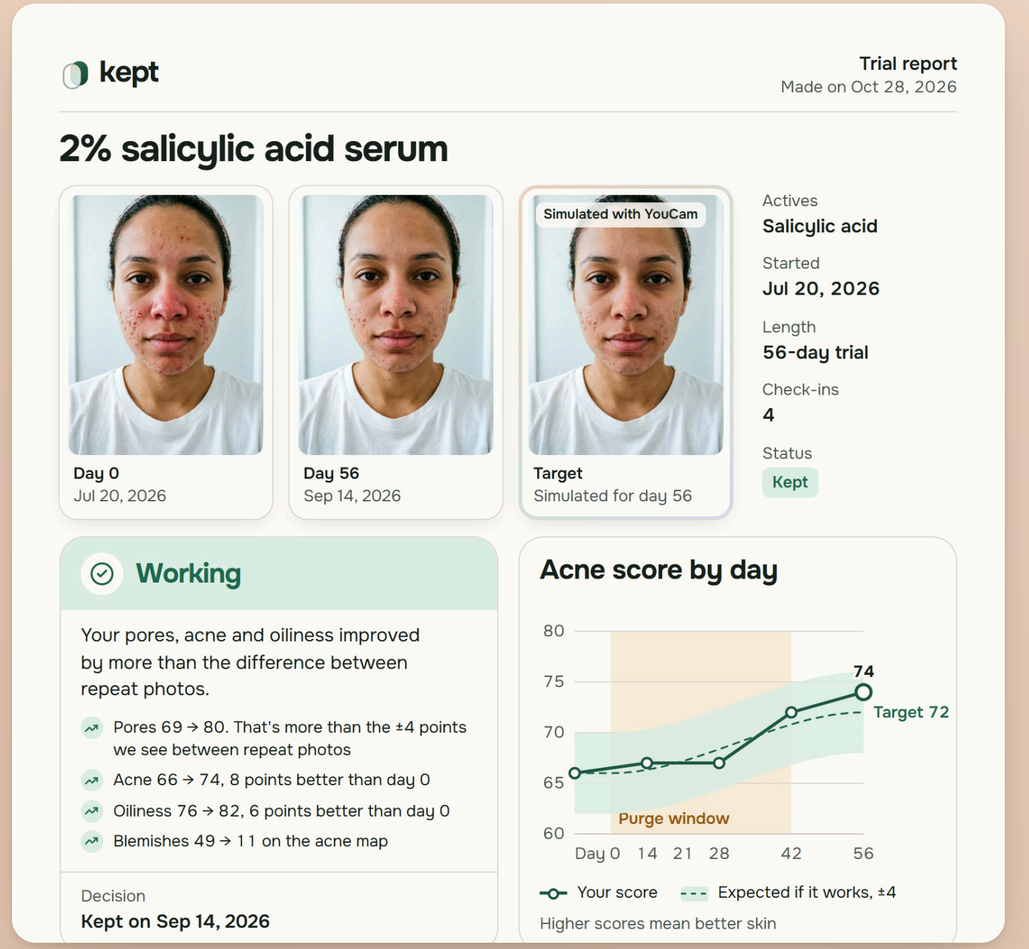

A reason not to quit a product in week two

Stores: trials after a purchase

Sold with the product, Kept gives the customer check-in dates and a verdict.

Brands: results or your money back

The trial report shows what changed and by how much. A guarantee is settled by a document, not an argument.

What's next

Today	Next
±4 comes from five versions of one generated photo	Volunteer repeat photos, a threshold per area
One timeline per active, whatever the formula	Timelines by concentration, and more actives
A web app people open on their own	An embeddable version for store order pages
Trials live in one browser	Sync, and a trial link for a dermatologist
